

CONTENTS

Foreword	iii	3.2 Intercropping with annual / seasonal spices	103
Acknowledgements	iv	3.3 Intercropping with Medicinal and Aromatic Plants	108
Preface	v	3.4 Intercropping with Biennials	109
Brief About Author	vii	3.5 Mixed Cropping with Perennials	111
Brief on NRIF	x	3.6 Mixed Cropping with Cocoa	122
Abbreviations	xi	3.7 Multi Storeyed Cropping	125
Chapter 1 - The Coconut		3.8 High Density Multi Species Cropping System (HDMSCS)	127
1.1 Coconut - the Versatile Tree Crop	1	3.9 Cropping Model	132
1.2 Botanical Features	2	3.10 Tidal Swamp Model	132
1.3 Growth and Development	21	3.11 High Density Integrated Plant-Animal-Human systems	132
1.4 Distribution of the Coconut Palm	32	3.12 Coconut Based Home Garden System	137
1.5 Latitude, Temperature and Day Length	37	3.13 Coconut Based Agroforestry Systems	142
1.6 Contribution of Coconut to Poverty Alleviation and Sustainability	48	Chapter 4 - Soil Fertility Management in Coconut Based Polyculture Systems	
1.7 Major Components of Coconut Based Polyculture Systems	51	4.1 Introduction	145
Chapter 2 - Poly Culture in Coconut and Opportunities for Multiple Cropping		4.2 Coconut Growing Soils	148
2.1 Nature of Coconut Holdings around the World	53	4.3 Nutrient Requirement of Coconut Palm	149
2.2 Layout for New Planting	53	4.4 Nutrient Requirement of Component Crops	150
2.3 Taking Planting Pits	54	4.5 Maintaining and Replenishing Soil Fertility During Plantation Establishment	152
2.4 Planting Methods	55	4.6 Integrated Plant Nutrition System (IPNS) in Coconut Based Multiple Cropping	153
2.5 Planting Density	57	4.7 On-Farm Recycling of Wastes in Coconut Based Cropping Systems	159
2.6 Replanting Old Coconut Plantations	60	4.8 Association of Plant Growth Promoting Rhizobacteria (PGPR) with Coconut	163
2.7 Weeding	64	4.9 Impact of Mixed Cropping and Other Practices on Soil Properties	164
2.8 Cover Cropping	68	4.10 Irrigation in Multiple Cropping Systems	174
2.9 Moisture Conservation	72	4.11 Sustainable management of coconut holdings	176
2.10 Biophysical Environment of Coconut Gardens Favouring Polyculture	80	Chapter 5 - Organic Recycling in Coconut Poly Culture System	
Chapter 3 - Coconut Based Polyculture Systems		5.1 Introduction	181
3.1 Intercropping	92		

5.2	Relevance of Organic Recycling in Coconut	182
5.3	Soil Management for Sustaining Coconut Productivity	183
5.4	Organic Recycling and its Relevance in Coconut Cultivation	183
5.5	Nutrients Requirement of Coconut Palms	184
5.6	Sources of Organics for Biomass Cycling	185
5.7	Beneficial Effects of Cropping/Farming Systems on Soil Fertility	192
5.8	Earthworms: Nature's Efficient Organic Waste Managers	193
5.9	Vermicomposting for Recycling Coconut Plantation Wastes	195
5.10	Mass Multiplication of Earthworms for Processing Huge Quantities of Organic Wastes	198
5.11	Collection and Processing of Wastes for Vermicomposting	198
5.12	Actual Vermicomposting Process	199
5.13	Compost Recovery	199
5.14	Vermicomposts: Properties, Applications and Benefits	200
5.15	Enhancement of Composting of Lignin-rich Biomass Using Microbial Cultures	201
5.16	Prospects of Application of Soil Biotechnologies in Organic Coconut Production	202
Chapter 6 - Plant Health Management Under Coconut Based Poly Culture System		
6.1	Pests and Diseases	203
6.2	Crop Diversity and Incidence of Pests and Diseases	205
6.3	Host Ranges of Pathogens	206
6.4	Regional Differences	211
6.5	Biological and Physical Effects of Plants on Pests and Diseases	211
6.6	Effects of Overhead Shade by Trees on Pests and Diseases	212
6.7	Effects of Soil Fertility on Pests and Diseases	221
6.8	Effects of Mulch and Cover Crops on Pests and Diseases	225
6.9	Crop Rotation	226
6.10	Future Research Needs	230

Chapter 7 - Harvest and Storage of Coconut

7.1	Stage of Maturity of Coconut at Harvest	233
7.2	Harvesting Indices for Coconut for Fresh and Processing Purpose	233
7.3	Methods of Harvesting	236
7.4	Coconut Bunch Support	237
7.5	Storage of Coconuts	238
7.6	Dehusking	239

Chapter 8 - Coconut Products

8.1	Food Products from Coconut	248
8.2	Products from Coconut Water	252
8.3	Products from Coconut Meat	255
8.4	Products from Coconut Milk/Cream	262
8.5	Products from Heart of Palm	267
8.7	Coconut Kernel Cake	269
8.8	Activated Carbon from Coconut Shells	269

Chapter 9 - Coconut for Health and Nutrition

9.1	Coconut Kernel Products and Health	271
9.2	Coconut Water and Health	274
9.3	Coconut Inflorescence and Health	277
9.4	Fresh and Fermented Coconut Sap and Health	278
9.5	Coconut Kernel Cake and Health	278
9.6	Other Coconut Products and Health	279
9.7	Coconut Oil For Health and Nutrition	281

Chapter 10 - Coconut Oil as Biodiesel

10.1	Coconut Oil – an important Bio-Fuel	297
10.2	Coconut Oil Fuel Composition	297
10.3	Coconut Biodiesel	298
10.4	Performance of Coconut Biodiesel	301

10.5	Development of Coconut Biofuel & Biodiesel In Asia and Pacific Regions	302
10.6	Socio-Economic Benefits	309
Chapter 11 - Economics of Coconut Polyculture Systems		
11.1	Analytical Procedures	313
11.2	Budgeting techniques	315
11.3	Economics of Multistoreyed Cropping	316
11.4	Economics of Mixed Farming	318
11.5	Employment Generation	319
11.6	Home Gardens	321
Chapter 12 - Strategies for Sustaining the Productivity of Coconut Lands through Polyculture Systems		
12.1	Constraints in the Adoption of Coconut Based Cropping Systems	329
12.2	Ways and Means for Increasing the Productivity and Income	330
	References	333

LIST OF FIGURES & TABLES

Table 1.1	Classification of Tall Coconut Yield Levels Under Normal Ecological Conditions	31
Table 1.2	World Area, Production and Productivity	33
Table 1.3	Area of Coconut in Coconut Growing Countries ('000 ha)	34
Table 1.4	Production of Coconut in Selected Countries ('000 t)	35
Table 1.5	Productivity in Copra Equivalent (t/ha)	35
Table 1.6	Proportion and Size of Holdings by Region	49
Table 2.1	Nut Production per Palm at Four Different Planting Densities	58
Table 2.2	Some Characteristics of Cover Crops	71
Figure 2.1	Schematic Representation of Available Intercropping Area in Coconut Stands	82
Figure 2.2	Three Common Planting Systems or Arrangements-Square, Rectangular and Triangular	82
Figure 2.3	Schematic Representation of Horizontal Root Distribution of a Multiple Intercropping System with Coconut	83
Figure 2.4	Schematic Representation of Vertical Root Distribution of Cacao Intercropped with Coconut	83
Figure 2.5	Root Activity Pattern of Coconut Palm in Relation to Lateral Distance from the Tree and Soil	83
Table 2.2	Mean Value of Percentage of Light Transmission in Coconut Stands as Affected by Density, Variety, Age, Height and Time of Day	84
Table 2.3	Major coconut-Soil-Crop Interaction Processes in Coconut Based Cropping Systems	86
Table 3.1	Estimated Income from Various Coconut Farming Systems	91
Table 3.2	Common Annuals Grown under Coconut	92
Table 3.3	Age of Coconut Palm, Levels of Sunlight Transmission and Suitable Intercrops	93
Table 3.4	Shade Effect and Yield Reduction of Some Annuals under Coconut	94
Table 3.5	Performance of Three Upland Rice Varieties as Intercrops in a Coconut Garden	95
